BIGLIETTI D' AUGURI

I nostri biglietti vengono stampati direttamente su materiale sintetico. Lastre in estruso di PVC, con struttura omogenea e superficie compatta, una microstruttura a forme concave e convesse alternate. Grazie alla sua versatilità, resistenza e leggerezza, si ottiene un prodotto spedibile a costi contenuti. Le lastre su cui vengono stampati i biglietti sono isolanti termici, acustici ed elettrici, anticondensa, imputrescibili, antimuffa, antibatteri ed inoltre ottime assorbenti di vibrazioni. Ottima resistenza ai colpi, non si scaglia, però fare attenzione al contatto con oggetti appuntiti e/o taglienti. Eccezionale planarità e omogeneità delle lastre. I colori degli inchiostri, aderiscono perfettamente alla microporosità di questo elemento sintetico, dando così risultati straordinari. Riflettono poco la luce artificiale, dando un ritorno visivo estremamente accattivante. La temperatura di rammollimento è di 80°. Ignifugo classe B1, assenza di sgocciolamento. Per quanto riguarda gli inchiostri con cui sono stampate tutte le nostre creazioni, vanno evitate le fonti di calore intenso, la luce solare diretta e l'eccessiva umidità.
